Regional Director
Region IV-A
Department of Education

Dear Sir/Madame:

Warm greetings!

The UP Alliance of Chemical Engineering Students, known as UP AChES, is a socio-academic organization under the Department of Chemical Engineering, College of Engineering and Agro-Industrial Technology at the University of the Philippines Los Baños. The Alliance aims to promote true academic excellence in the field of chemical engineering, holistic growth, service and leadership in the industry and society, and the promotion of the chemical engineering profession.

As part of its continuing goals, the organization will be holding the National Science and Youth Congress 2017 on February 18 (Saturday), 8:00AM to 5:00PM at the University of the Philippines Los Baños. The National Science and Youth Congress (NSYC) is composed of three major events namely: NSYC Symposium, Mental Smackdown, and Youth Greenovation. It is an annual inter-high school event that celebrates today's young and innovative minds through a quiz contest, a science fair, and a symposium. This is also an avenue for high school students to showcase their scientific knowledge through art, literature, and public speaking. This year, the awareness on the sustainability of our mineral resources will be featured.

The NSYC Symposium serves as an avenue for the youth to learn and discuss the different issues in different fields of study. This year, NSYC Symposium will address the issues on the sustainability of our mineral resources by inviting experts and professionals in the said field and will tackle solutions which the youth can offer.

Mental Smackdown 2017 is a quiz contest not only in the field of mathematics, biology, chemistry and physics but also in environmental issues, which, for this year, is about sustainability of our mineral resources. It also promotes healthy academic competition and scholastic sportsmanship among its participants.
