Dear Ms. Cherrylou DJ. De Mesa,

Would you like to use educational technology at your division? Select public schools in your division may be eligible for a charitable grant. Darryl said this is something you'd be interested in.

STEAM Craft Edu Inc. is an international supplier of educational games. Our office is in Makati and we are supported by NGO Partners in the Philippines. This enables us to provide our games to eligible schools through charitable grants.

Planeteers is a fun learning game designed for students in Grades 3 to 6. We developed Planeteers to enhance students' learning in Science, Technology, Engineering, Arts and Mathematics aka STEAM (*Learn more [here.](#)*) Planeteers introduce skills of the future, like coding, to students.

Presently, teachers use Planeteers to supplement their lessons with quizzes, fun activities, and games. Students practice the knowledge they learned from the teacher on Planeteers. Take a peek into the Planeteers Game [intro video below.](#)

A comprehensive STEAM Curriculum containing hundreds of lessons is available via the Teacher's Center. Teachers also have access to the Teacher's Dashboard to track students' progress and quiz results.

Our grant funding provides eligible public schools with free licenses to use Planeteers. The grant includes teacher materials and school support so you can make the most out of the latest education technology. The game runs off-line (no internet needed) on computers and tablets.

I'd love to share more about Planeteers with you over a call. We can discuss how Planeteers can integrate and help teach students STEAM concepts in a fun way. Let me know when you're available.

Cheers,
Jaymee Duran
[+639088763587](tel:+639088763587)

PS. Schools can directly apply for Planeteers grants. Applications are ongoing. [CLICK HERE TO APPLY.](#) It only takes a few minutes to complete the eligibility assessment. They'll receive a call from us 1-3 days after receiving their application to discuss next steps. PPS. Learn more about Planeteers via [downloading the Planeteers' brochure here.](#) And you can visit our website here: www.steamcraftedu.com.
