Warm Greetings!

The **UP Alliance of Chemical Engineering Students**, known as **UP AChES** (ey-ches), is a socio-academic organization under the Department of Chemical Engineering, College of Engineering and Agro-Industrial Technology at the University of the Philippines Los Baños. The Alliance aims to promote true academic excellence in the field of Chemical Engineering, holistic growth, service and leadership in the industry and society, as well as the promotion of the Chemical Engineering profession.

As part of its continuing goals, the organization will be conducting an activity entitled, "**National Science and Youth Congress 2018**" on **February 10, 2018 (Saturday)**. The **National Science and Youth Congress (NSYC)** is an inter-high school competition which aims to celebrate today's young and innovative minds through a quiz contest (**Mental Smackdown**), a symposium (**Syntegrate**), and a science fair (**Youth Greenovation**). NSYC serves as a venue for junior and senior high school students to showcase their scientific knowledge and practice friendly competition among other junior and senior high school students from different parts of the country. This year, the awareness on the recent issues on marine conservation of the country will be featured to fuel the scientific mind of today's youth.

Syntegrate, which focuses on the theme "**Exploring the Depths of the Seas: The Youth for Marine Conservation**", aims to raise awareness about the recent issues on marine conservation. In line with the objectives, this year's **Syntegrate** will include a symposium that will feature speakers who will discuss the current situation of the marine environment in the Philippines as well as some of the alternatives and solutions leading to the protection and preservation of ecosystems in oceans and seas. Different events namely **On-The-Spot Poster Making Contest**, **Essay Writing Contest**, and **Impromptu Speech Contest** will take place after the symposium. Meanwhile, for participants who do not opt to compete, an integrating activity will be held. These activities will serve as an avenue for the students to apply the knowledge they have learned from the symposium.

Youth Greenovation is an inter-high school science fair open to junior and senior high school students. It serves as an avenue for showcasing students' research skills in different fields of study and enhancing their involvement in the protection and preservation of the environment. It consists of two categories: **Green Life** and **Green Technology**.

Mental Smackdown is a quiz contest for junior high school students. It aims to give its participants a healthy competition among teams from various schools and provide an avenue for academic growth, not only in the fields of mathematics, biology, chemistry and physics but also in the field of environmental issues, which, for this year, is about marine conservation.

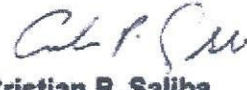

In line with this, we are requesting that your office approve our event as **DepEd accredited** and the **issuance of DepEd Advisories (DAs)** to announce the conduct of the said activity. Rest assured that we will follow all the protocols of the Department of Education regarding accreditation of activities.

Should you have questions and/or suggestions regarding the activity, you may contact the **Activity Head** at **0998-575-5759** or the **President** at **09267244287**.

We are hoping for your favorable response regarding this matter. Thank you and God bless!

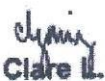

Sincerely yours,

Megan G. Badongen
Activity Head

Cristian P. Saliba
President
