### COMPETENCY BASED TRAINING FOR GLOBAL EXCELLENCE

# THERMAL IMAGING

**Course Background:** The EPIRA law mandates reliability, efficiency, and practically zero downtime in substation apparatus operation. Technical services group, power system maintenance team, and facilities maintenance engineers are the front liners in ensuring the asset longevity operation and recovery of investments.

#### HIGHLIGHTS OF THE TRAINING

- Qualitative analysis
- Quantitative analysis
- Rules of thermal science
- Infrared camera use
- Hands-On Testing

#### Who Should Attend?

- Building Managers
- Property Manager
- Plant and Substation Maintenance
- Maintenance Personnel

About the Program

After the program, the participants will be able to:

- Define the applications and benefits of infrared technology in electrical installations
- Define Thermal Imaging Concepts
- Enumerate practical interpretation of results, images, and targets
- Display practical approach to non-invasive maintenance
- Experience what a thermal image can reveal
- Demonstrate practical application of thermal imaging

#### Program Registration

#### Program Schedule:

**August 8, 2018**

**September 12, 2018**

**Venue: Pamav Tech**

6th Floor **68 Kalayaan VCP**,  
Kalayaan Avenue, Teacher's  
Village West, Diliman Quezon City
